

Data Professionals Annual survey data

Tewebo Teshome March 15, 2024

EXECUTIVE SUMMARY

- Tech professional 2019 Annual survey data Analysis result
- The data accessed at IBM's cloud database is imported into python and processed using pandas library
- Most software developers are using JavaScript which is the most preferred for next year too
- Mysql was the most utilized database language while the next preferred database program is Postgres
- Most of the tech developers are from west
- · Also, men are dominant in the sector

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

INTRODUCTION

- Tech professional 2019 Annual survey data Analysis result
- The data has 11552 rows and 85 columns
- From the total data features the programming language, database management, web frame and plate form preferences
- Also, demographic analysis of the tech experts will be reviewed

METHODOLOGY

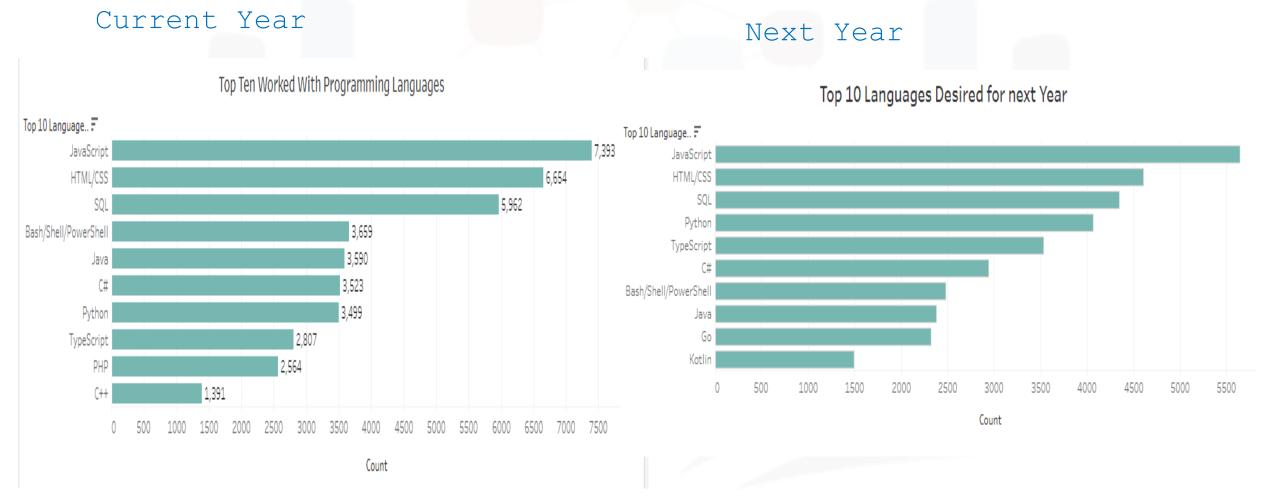

- The data was accessible at kaggle and at IBM's teaching cloud database
- The data from either sites is imported into python and processed using pandas library
- The target features are reviewed for any missing values are imputated using mean or median as appropriate from the distribution of the data
- Exploratory Data Analysis is made using python and matplotlib to visualize the distribution of the data
- Outliers are removed and dashboards prepared for the most vital features

RESULTS

 Results of the data analysis findings from the data set are presented here in the next slides

PROGRAMMING LANGUAGE TRENDS

Findings in 2019

- Most software developers are using JavaScript
- Html/CSS is the second most utilized programming language
- Python is the 7th most utilized language

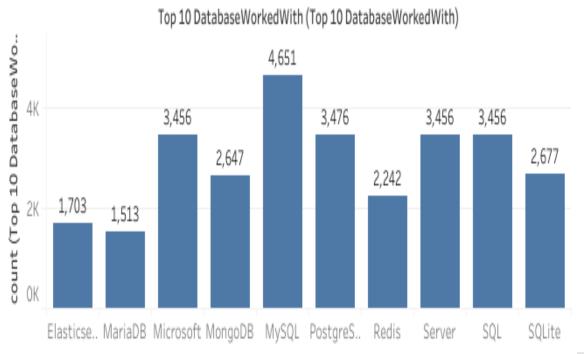

Future implications

- Most programmers continue to prefer JavaScript
- The second most preferred language for the future is html/CSS
- Python is the 4th Most desired language

DATABASE TRENDS

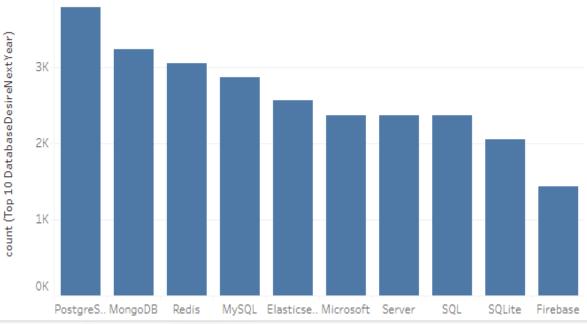

Current Year

Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Mysql was the most utilized database language
- SQL was the second most utilized database language
- Sqlite is the 6th most used database language

Implications

- Postgres is the most preferred database language
- MongoDB is the second most preferred database language
- Sqlite is the 9th most preferred database language

DASHBOARD TAB 3

DISCUSSION

- Most of the soft ware developers are from US
- There are no developers from central and western Africa
- In terms of Gender more than 95% of the developers are male.
- Most of the developers are in the age of 24 -32

OVERALL FINDINGS & IMPLICATIONS

Findings

- Tech professionals preference over platforms and programming languages are changing over time
- Most of the tech developers are from western countries

Implications

- jQuery is the most used web frame
- While React.js is the trending web frame
- Doker and linux are the most used plateforms
- Though linux will keep utilized Doker will be replaced by AWS

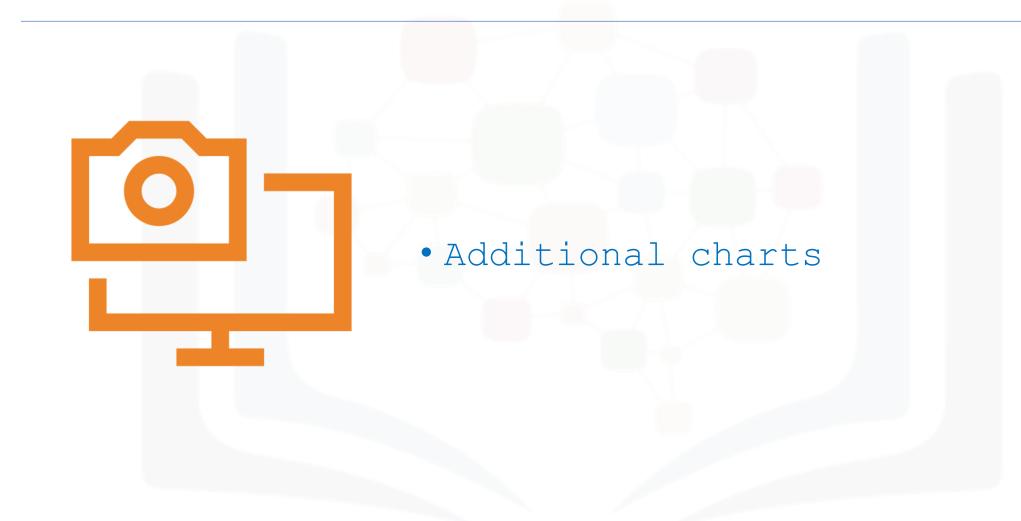

CONCLUSION

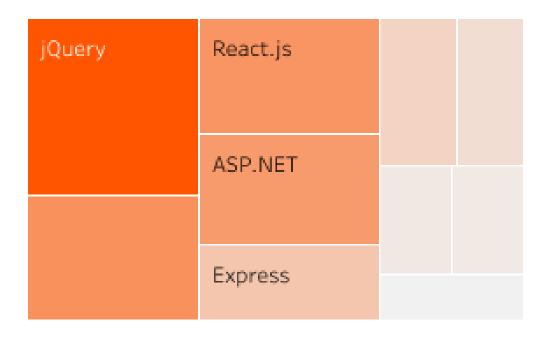

- The tech jobs are becoming attractive is the west
- The preferences of programming and database languages are changing
- Men are dominating the tech profession
- Annual payments are increasing for tech experts
